

# Be Brilliant, Be Smart

Single Flavor, Countertop, Intelligent Control

Model: **NE1115EL**

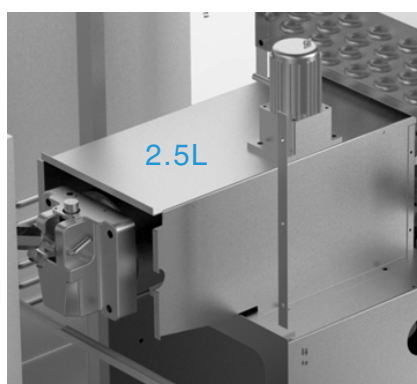

Touch Screen | Quick Cooling | High Overrun | Quiet

## Quick Freezing and Big Output

- With a new revolutionary TITAN™ freezing cylinder and the brilliant 1.5HP Embraco compressor, the first dispense requires only 8 - 10 minutes and 30 portions (60g/portion) can be dispensed continuously.

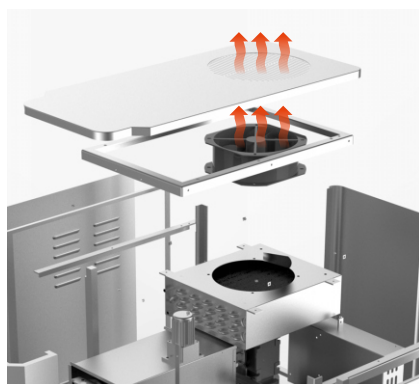

## Thawing Function

- NE1115EL are equipped with a thawing function, which can heat the cylinder to cut the cleaning time by HALF. Also, will heat-up the cylinder in the unlikely event of a cylinder froze.

## Intelligent Control System A.A.T.I.S.™

- A.A.T.I.S is a user-friendly control system, it will monitor overall machine performance and log unexpected deviations for easy maintenance.  
- Enable custom setting such as product viscosity, freezing temperature and product counts for smart business owners.

## New Vertical Ventilation System

- Ensure maximum space utilization and machine performance.

## Quiet Inverter Technology

- Smooth start-up and reboot, quiet operation; prolonged machine life.  
- Operation noise between 60-70 decibel.

## New Stainless Steel Beater with Retract Action

- The newly added retract action will create a full cycle of mixture movement inside the cylinder, this will ensure optimal ice-cream consistency and minimize waste.

## Bottom-Up-Tech™

- The Independent pre-cooling chamber beneath will keep your mixture chill and fresh.  
- Automatic mixture agitation will ensure you products' consistency before freezing.  
- The adjustable imported Italy gear pump will produce a stable ice-cream overrun between 30% - 60%.

## TECHNICAL DATA

Capacity	Power	Voltage	Compressor	Mix Hopper	Cylinder	Weight (KG)	Refrigeration	Cooling	Exhaust Direction	Overrun	Dimension (mm)
30L/H	1900W	220V 50/60HZ	1.5HP	1*8L	1*2.5L	121	R404A(Standard) / R448A(Optional)	Air cooled	Vertical	30%-60%	810*380*920

**Standard:** Pre-Cooling, Stainless Steel Handle, Mixture Agitator, Gear Pump, Stainless Steel Shell, Automatic Rebound Valve Body

\* These specifications are subject to change without notice as further research and development efforts continuously improve the model.
