

Oceanpower

A New Generation of Soft Serve Freezer

Dual Control NE Series

Model: NE1430

Pre-Cooling

Quick Cooling

Safety Protection

Standby Mode

Low Mix Sensor

ADVANTAGES & BENEFITS

DOUBLE SYSTEM MACHINE NE1430

Dual Control System

NE Series can be turned off separately, Two microprocessor controls separate control of each flavor and both sides can work separately. Siemens touch screen with displaying operating.

Italian Gear Pump (option)

Italian gear pump improves the taste and increase production capacity. The maximum expansion can reach 50% - 60%; (Different mixture, different expansion rate)

Upgraded Mixture Agitator

Make the temperature of the mixture more uniform and have better liquidity. When the mix level is low, the Mix Low light will turn on to remind operator to add mix.

Automatic Rebound Valve Body

Rebound pistons—control ice cream making speed Automatic handles homing—press the handles and auto return back.

Optimized Gear Reducer

Optimized gear reducer designs ensure ice cream taste and lower maintenance cost.

Optimize refrigeration system

Maximize the efficiency of refrigeration advantages, reduce refrigeration time, make ice cream molding quickly, have high output and easily cope with peak passenger flow, lower energy consumption, and more environmentally friendly

TECHNICAL DATA

Model	NE1430
Flavors	2+1mixed (Dual Control)
Capacity	50L/H
Mix Hopper	2*12L
Cylinder	2*2L
Power	4400W
Main Compressor	1.5HP/1.25HP *2 (Dual Control)
Standard	Pre-Cooling, Mixture Agitator, Stainless Steel Handle, Automatic Rebound Valve Body, Stainless Steel Shell
Options	Italian Gear Pump/Gear Pump
Cooling System	Air Cooled
Refrigerant	R404A(Standard) / R448A(Option)
Voltage	220V/380V 50Hz / 60Hz
Net Weight / Total Weight	220 / 255kg
Dimension	540 *890*1005mm

Manufactured by:

OCEANPOWER FOOD EQUIPMENT TECH CO., LTD

C9 8 Floor, Tianjing Building, Tian'an Cyber Park, No. 6 Tairan

No.5 Road, Tianan community, Shatou Street, Futian District, Shenzhen .
